### EXMAR GROUP'S SHIPBUILDING EXPERIENCE

EXMAR NV and CMB affiliated companies have built containers, oil tankers, bulk carriers, gas carriers, and most recently two new classes of ships, the Exmar designed LNGRV (LNG Regasification Vessel) and the LPGFSO (LPG Floating Storage Offshore).

EXMAR maintains its own construction and project management personnel based in Antwerp and Asia to oversee and manage vessel building projects. Presently, on behalf of itself or affiliated companies of the CMB Group, EXMAR is overseeing the construction of 6 LNG tankers at Daewoo and Samsung shipyards in Korea, 3 VLCC's at Hitachi in Japan, and 2 VLCC at Daewoo in Korea. After delivery, full technical management of the vessel is performed by TECTO, EXMAR's ship management company.

Newbuild activities include project management, procurement, specification review, technical negotiations, plan approval, yard supervision tests and trials.

Recently built and scheduled vessel-build projects include:
